

Spill Tab

EFFECTIVE SPILL CONTROL FLAT TAB

Really new stuff happens rarely any where. Spill Tabs are a completely new way of looking at water based spills. Quick and easy to deploy Spill Tabs gives instant relief where things are starting to get out of hand

- Blown polypropylene outer sock which is robust enough to apply anywhere.
- Contains a pressed Polymer Sheet which is highly absorbent and remains dustless.
- Absorption rate of 6000% of it's own body weight, each 1.2 meter tab will absorb 3.5 litres of water.
- Once the water is captured the sock is easily removed without leaking or spreading the spill around.
- Each box contains 25 x 1.2 meter tabs in a roll which can be taken off singulary or quickly deployed as a 30 meter boom.
- Double banking the boom ensures maximum efficiency.
- The light shoebox sized Spill Tab dispenser can be easily taken anywhere and will absorb as much as a far larger box of absorbent socks or pads. Making it ideal for the back of a van or storage in accessible places within the premises.
- The flat sock can be placed under a door to create a seal against water ingress.
- Ideal for soaking up the final residue water in tanks or placing on a leaking windowsill

Essential -

Spill Tabs will quickly remove any problems surrounding water spillages, have a roll to hand wherever you need them.
